

COLLEGE OF MIDWIVES OF BRITISH COLUMBIA

PEER CASE REVIEW LOG*

*As a part of CMBC's Quality Assurance Program and Peer Case Review Policy every practicing midwife must participate in at least **four** peer case review sessions every registration year (April 1st – March 31st). For every three-month period that a midwife is non-practising this requirement is reduced by one session. For each session, a group of at least four midwives shall meet to discuss the clinical care of clients, reviewing a minimum of two cases at each session, or a minimum of eight cases per year. Peer case reviews refer to care to date and can include the review of cases at any time during the antenatal, intrapartum and postpartum period while care is current or once it has been completed.*

No details of the cases reviewed should be recorded in any format. A review of this nature is not protected under Section 51 of the Evidence Act therefore it is important to ensure the anonymity of the cases being reviewed and not to produce any documents from the review outside the log. Please complete one log sheet per registration year.

Name: _____

April 1, ____ to March 31, _____

	Date	Number of Midwives ¹	Number of Practices/ Sites Represented ^{2, 3}	Reviewed by Teleconference, In-Person or other	Hospital Department Rounds ⁴		Number of Cases Reviewed ⁵	Number of Home Births	Number of Hospital Births	Number of Transfers From Home to Hospital
					Yes	No				
Session 1:										
Session 2:										
Session 3:										
Session 4:										
Session 5:										
Session 6:										
Session 7:										
Session 8:										
Session 9:										
Session 10:										
Session 11:										
Session 12:										

Please note that the Peer Case Review Log does not need to be submitted to CMBC, but must be made available to CMBC for inspection upon request.

¹ Where a large number of midwives are in attendance, an estimate can be used i.e. > 4.

² Where a large number of practices are in attendance, an estimate can be used i.e. > 2.

³ Each midwife must participate in at least one peer case review each year that includes participation from midwives belonging to at least two different practice groups.

⁴ Peer case reviews carried out by a group of midwives in a hospital department may count toward meeting this peer case review requirement, so long as each midwife participates in at least one review each year that addresses care provided at a homebirth.

⁵ Cases may include: antenatal only; or antenatal, labour and birth; or antenatal, labour and birth and postpartum.
