

# POLICY ON ALTERNATE PRACTICE ARRANGEMENTS

## DEFINITIONS

**Standard Model:** The delivery of midwifery care, subject to *the Midwives Regulations, Bylaws for the College of Midwives of BC*, and the *Standards of Practice*.

**Alternate Practice Arrangement:** The delivery of midwifery care, subject to the *Midwives Regulations and Bylaws for the College of Midwives of BC*<sup>1</sup>, with approved exemptions to Standards 1.3, 6.1, 6.4 and/or 7.2 of the *Standards of Practice*.

**Alternate Practice Arrangement Letter of Agreement:** A document that outlines terms, duration, renewal, reporting and quality assurance requirements of the approved Alternate Practice Arrangement, as well as any conditions to be imposed on the midwives' registration upon returning to the Standard Model.

## POLICY

Alternate Practice Arrangements (APAs) offer opportunities for innovative approaches to the delivery of midwifery care while ensuring public safety and adherence to the *Midwives Regulations and Bylaws for the College of Midwives of BC*. APAs are established based on community, client and/or provider need including but not limited to:

1. serving a population of clients with unique social and/or medical requirements;
2. sustainable practice amongst midwives and/or other perinatal care providers.

APAs typically have approved exemptions from Standard 1.3 (midwife as primary care provider), Standard 6.1 (comprehensive care through all trimesters, labour, birth and postpartum), Standard 6.4 (continuity of care provider, no more than four care providers) and/or Standard 7.2 (providing care in all settings) of the *Standards of Practice*. Only registered midwives in good standing with CMBC are eligible to apply for APAs.

A new registrant working subject to the *Policy on New Registrant Requirements* is expected to work in the Standard Model as described in the *Standards of Practice*. New registrants working within the *Policy on New Registrant Requirements* may apply for an APA with requested modification to Standard 6.4 only.

## Professional Considerations

- All registrants working within an APA must meet CMBC Quality Assurance Program requirements and two-year active practice requirements (if applicable) in addition to quality assurance measures set out in their APA Letter of Agreement; failure to meet these measures or unsatisfactory results may result in the dissolution of the APA and/or a referral to the Inquiry Committee.

---

<sup>1</sup> CMBC does not have the authority to exempt midwives from adhering to the Midwives Regulation or the Bylaws of the College of Midwives of BC.

- A registrant working in an APA may simultaneously work within the standard model (e.g. as a locum in another practice) so long as they meet CMBC Quality Assurance Program requirements for currency and competency.
- A registrant working in the standard model does not need to apply to join an established APA if they plan to work for less than six consecutive months in the APA (e.g. as a locum).
- Working exclusively in an APA for more than three years may result in the placement of conditions on a registrant's registration when and if they return to the Standard Model. For example, a registrant working within an approved APA providing only prenatal and postnatal care for a three-year period will be required to register in the Conditional Return to Practice category to ensure mentorship and supervision for a specified number of births attended upon returning to the Standard Model.
- Registrants working within an APA must be aware that doing so may affect their class of registration and/or eligibility for inter-provincial registration reciprocity.

## Application Process

CMBC staff are available to meet with registrants to discuss their applications prior to submission. There are two streams to apply for an APA. Registrants interested in establishing a new APA will submit an *Application to Establish an Alternate Practice Arrangement*. Registrants seeking to join an established APA for more than six months will each submit an individual *Application to Join an Established Alternate Practice Arrangement*.

## Requirements and Approval Process

Each *Application to Establish an Alternate Practice Arrangement* is unique and will be approved on a case-by-case basis. Approval of one application does not constitute a precedent for approval of other applications. In reviewing each application for approval, CMBC staff will use a standardized evaluation rubric to determine whether the APA satisfactorily meets the following requirements:

- adheres to the *Midwives Regulations and Bylaws for the College of Midwives of BC*;
- offers high quality and safe perinatal care in the context of proposed exceptions to *CMBC Standards of Practice*;
- addresses a perinatal care need;
- plans for a high level of client satisfaction;
- improves access to perinatal care;
- contributes to health promotion and disease prevention;
- maintains or increases clinical learning opportunities for midwifery and other students;
- includes a sustainable funding model;
- includes plans for self-evaluation and quality assurance; and
- presents a transparent communication strategy for the public with regards to deviations from the Standard Model.

The process of considering an application for project approval is iterative; CMBC staff may request supplementary materials and/or escalate the application to the Approval Panel of the QA Committee for final consideration. Only midwives who have been approved following an application process under established CMBC criteria may work within the specified APA. Once approved, each applicant registrant will sign an individual Alternate Practice Arrangement Letter of Agreement. Upon dissolving or withdrawing from an APA, each applicant registrant must immediately notify CMBC.
